DETAILED ACTION

The following action is in response to the amendment filed for application 10/605,639 on May 16, 2005.

Allowable Subject Matter

Claims 1, 5-7, 15-16, and 18-27 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or render obvious the method for operating a vehicle having a torque producing assembly as claimed, and particularly including operating the torque producing assembly at a certain speed, monitoring a change in temperature of the assembly; suing the change to ascertain the amount of time in which a maximum temperature value will be achieved; reducing the certain speed of the assembly when the amount of time is less than a certain value, and including the remaining controls of claim 1. The present invention also particularly includes the time calculation being based on a predetermined temperature gradient and determined temperature difference; and including the remaining controls of claims 15 and 23 respectively (with regard to the regulation of the components).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
